Podvalník P 50

Měřítko 1/35

Stručná historie

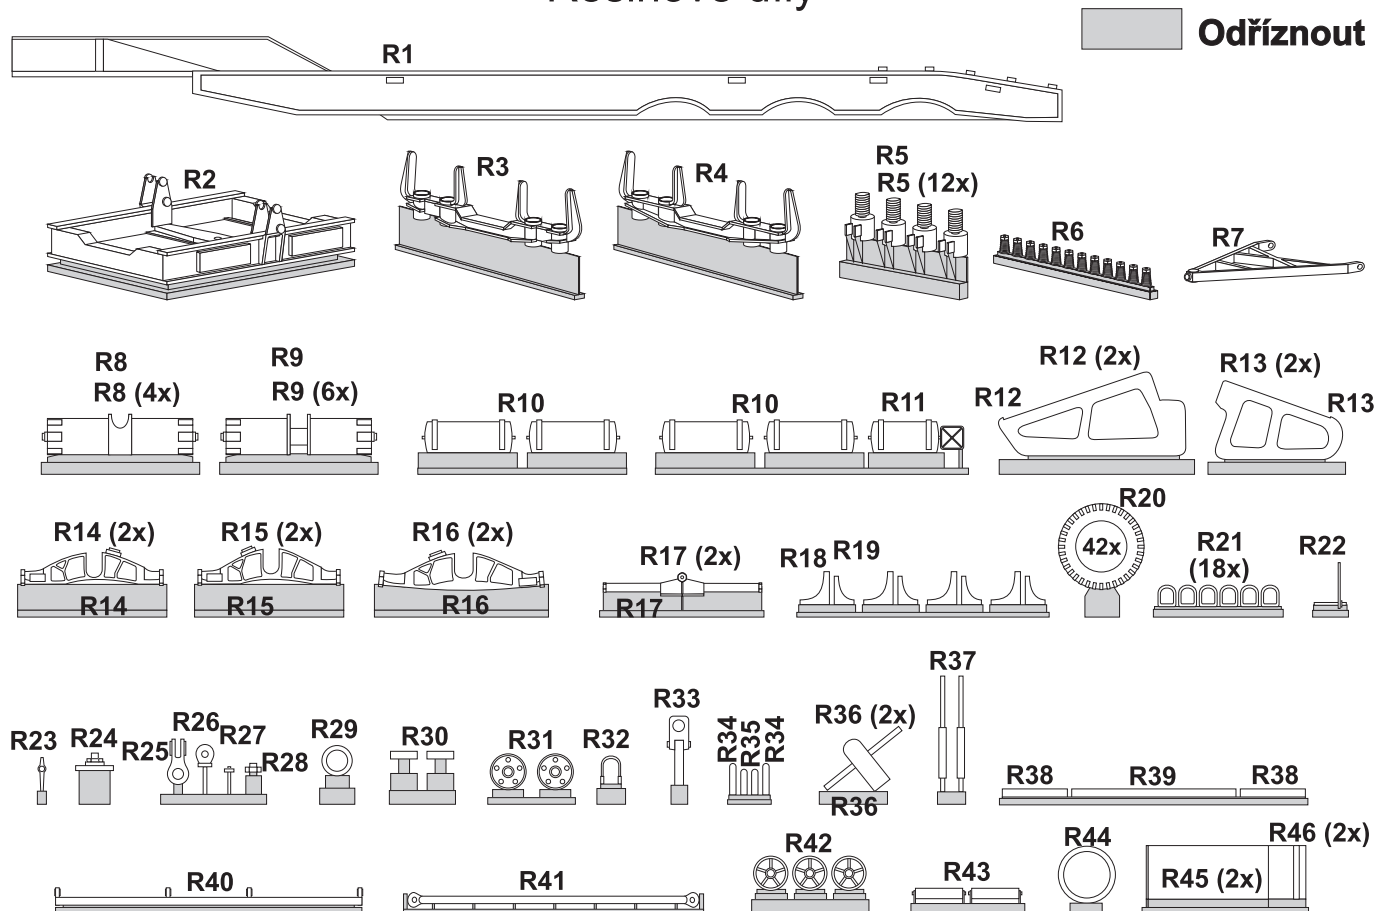

Těžký podvalník P-50 je určen k rychlé přepravě pásové a kolové techniky a jiného materiálu do hmotnosti 63 tun. V nouzovém případě až 80 tun, maximální rychlost však může činit 10 km/h. Je řešen pro jízdu v soupravě s tahačem po komunikacích I. až III. třídy, po cestách se zpevněným povrchem a po únosném terénu bez vnějších nerovností a překážek.

Podvalník je pětínápravový přívěs s rovnou ložní plošinovou plochou. Skládá se z rámu s plošinou a nájezdovými můstky, náprav s vozidlovými koly, brzdové soustavy, řízení a elektroinstalace. Výrobce byl podnik Transporta Chrudim
